💡 PROFESSIONAL SUMMARY

Full-Stack .NET Developer with 5+ years of experience designing scalable web and cross-platform applications. Expert in **C#, ASP.NET Core, React (Next.js), and Docker**. Proven track record in delivering real-time logistics systems and government document control tools.

Early adopter of **AI-driven development (Claude Code, Cursor)** to accelerate delivery and maintain high code quality. Skilled in legacy migration (WPF to .NET Core), SQL optimization, and mobile-first WMS solutions. Agile team player with an ownership mindset and strong debugging skills.

🔧 TECH STACK & CORE SKILLS

Languages & Frameworks

- C#, ASP.NET Core, Entity Framework, LINQ
- React (Next.js), Xamarin, TypeScript, JavaScript
- HTML5, CSS3, Tailwind CSS, WPF

AI & Modern Dev Tools

- **AI Coding:** Claude Code (Antigravity), Cursor IDE, GitHub Copilot
- **LLMs:** Custom Llama models for local automation, OpenAI API integration
- **Productivity:** Prompt engineering for debugging, refactoring, and documentation

Web & APIs

- REST API Design, WebSockets, JWT Auth, Modular UI, Admin Dashboards

Databases & DevOps

- MS SQL Server, PostgreSQL, T-SQL, Stored Procedures
- Azure, AWS, Docker, GitHub Actions (CI/CD), Firebase

👛 PROFESSIONAL EXPERIENCE

AproSoft P.H.U. Zbigniew Klima – Kraków, Poland

Full-Stack Software Engineer (.NET + Xamarin + React) | Aug 2021 – Jan 2025

- Delivered WMS/DMS systems for government and logistics clients using ASP.NET Core +

React.

- Built real-time logistics data flows via WebSockets and integrated mobile WMS scanner apps (Xamarin).
- **Refactored core modules to async pattern**, reducing SQL latency by 22%.
- Utilized **AI-assisted development (Cursor)** to expedite UI refactoring and unit test generation.
- Automated CI/CD pipelines via GitHub Actions, cutting release cycles by 70%.

Delivery Software (Delivio) – Minsk, Belarus

Backend Developer (Database + Real-time Focus) | Aug 2020 – June 2021

- Built Firebase-integrated admin dashboard (2,000+ users) with async status updates.
- Refactored reporting engine, reducing SQL load time from **90s to <10s**.
- Optimized scalability using advanced caching strategies and async calls.

Unet.by – Minsk, Belarus

Junior .NET Engineer | Dec 2019 – June 2020

- Modernized WPF-based modules, improving UI loading time by 10%.
- Maintained live debugging and hotfix pipelines during high-load release cycles.

SELECTED PROJECTS & CONSULTING

.NET Consultant (.NET Core + Next.js) | 2018 – Present (Freelance)

- Migrated legacy WebForms to modern ASP.NET Core + Next.js architectures.
- Deployed Docker-based containers to AWS (EC2 + RDS) with custom performance tuning.
- Leveraged **Llama-based local models** to automate code audit reporting for small/medium clients.

EDUCATION

- **Opole University of Technology (Poland)** – BSc Computer Science (Remote, Leave of Absence)
- **Belarusian State University of Informatics and Radioelectronics** – Bachelor's Degree in IT (2021)
- **College of Business and Law (Minsk)** – Associate Degree in Computer Science (2018)

LANGUAGES

- **English:** Advanced (B2)
- **Polish:** Advanced (B2)
- **Russian & Belarusian:** Native
